

To celebrate its 30<sup>th</sup> anniversary, Rays has reserved an exclusive gift for visitors who will come to visit us at the booth 6 J04

### **DERMARAYS Dermocosmetic for sensitive skin**

Made in Italy quality.

After affirming its leadership in the medical market, considered one of the most demanding and competitive sectors, Rays has successfully entered the universe of cosmetics, with highly specialized products, designed for the needs of healthcare facilities (Hospitals, Clinics, RSA, Nursing Homes) and private individuals, who can find Dermalays treatments in Pharmacy.

The entire design and production cycle of Dermalays, from the Research & Development phase to the processing and packaging phases of the products, takes place entirely in Italy, within our factory in Osimo, in the province of Ancona. This is why Rays is able to guarantee the highest quality standards in cosmetic production, from the selection of raw materials to the control of the finished product. Rays products are present in over 5000 hospitals and clinics, demonstrating our quality and reliability: the same that we put into creating Dermalays treatments, dedicated to the most sensitive skin.

Dermalays is formulated respecting the needs of people with high skin sensitivity and who need to purify, moisturize and nourish their skin, at the same time. We selected Aloe vera and Lactoferrin as the main ingredients to satisfy different needs. Multiple active ingredients are added to enrich the properties and functionality of the treatments.
