

Plastic as Science

At the end of Fifties, the plastics technological developments led naturally to the birth of the **Labware Division**, the Kartell section specifically dedicated to study and supply products for the laboratory market. The Division uses raw materials, such as Polypropylene, Polystyrene and Polyethylene to produce a wide range of lightweight, highly resistant and economic products, the natural alternative to the glass. *That's the reason why Kartell is today internationally known as a leader in high quality technical laboratory products.*
